The global pandemic has been a major disruptive force of change putting forth the critical role of data analytics; can Active Tracking replace Passive Tracking to achieve this goal today?

The global pandemic has been a major disruptive force of change while additional dynamics around data driven decision making bring pressures to adopt end to end visibility. These dynamics underline the mission-critical role of data capture and analytics to further improve effectiveness for all organizations in the supply chain. The question now is, what will it take to replace the older passive tracking manual intensive ecosystems within cold chain & bio-pharma to fully automated cloud based active tracking solutions without impacting the budget and operational overhead. And what is the relationship between technology, smart packaging, and the supply chain movers to adopt innovation at the speed of progress.

KEY TOPICS OF DISCUSSION

- ⊗ What is the definition of Active Tracking vs. Passive Tracking
- ⊗ The impact today of Active Tracking and the intrinsic value it brings over current non-connected solutions
- ⊗ The importance of collaboration between smart packaging, innovative technology, and the symbiotic relationship to cold chain distribution
- ⊗ What does advanced analytics mean to your decision making and are you ready to integrate at governing level to transform monitoring
- ⊗ The market says by 2025 50% of all global supply chain will be utilizing Active tracking in some capacity, do we agree 2025 is realistic sooner/later
- ⊗ What will be the largest hurdle to overcome, budgets or change management
