

STRATEGY DINNER

Experts Share with Experts: Building a Flexible and Robust Clinical Supply Chain with Clinical Operations, Clinical Trial Supplies, and Vendors

By attending the round table event delegates will gain invaluable insights into optimizing their clinical supply chain operations. Through engaging interactive discussions, the attendees will learn strategies to enhance the robustness, flexibility, and sustainability of their supply chains, ensuring seamless delivery of vital resources and treatments. Delegates will leave equipped with practical knowledge, actionable solutions, and a network of industry peers, empowering them to transform their clinical supply chains and improve patient outcomes.

AGENDA

18:00–19:00	Welcome Cocktails and Networking
19:00–20:00	ROUNDTABLE DISCUSSION Collaborative Excellence: Streamlining Efficiency in Clinical Supply Chain Management The interactive discussion will explore the construction of a clinical trial supply chain that combines flexibility and robustness. We will emphasize critical supply chain elements, such as communication, visibility, and flexibility and highlight the significance of a close collaboration between Clinical Operations, Clinical Trial Supplies, and Vendors to ensure the success of clinical trials. <ul style="list-style-type: none"> • Key Elements: Communication, Visibility, Predictability, Flexibility • Ensuring adaptability to unexpected changes and minimizing risks Sascha Sonnenberg , VP Global Business Development & Country Head Germany, Sanaclis
